Education

COMSATS University Islamabad

Islamabad, Pakistan

Bachelor's in Data Science, CGPA: 3.26

2022-2026

Bahria College Anchorage, Naval Anchorage

Islamabad, Pakistan

ICS

2020-2022

Summary

Data Science graduate with hands-on experience in banking analytics, ML-powered dashboards and full-stack ML/AI applications, seeking a Data Analyst/Business Analyst role where I can leverage Python, BI tools, and predictive modeling to drive business decisions.

Skills

- **Languages:** Python, Java, JavaScript, SQL, C++, R, HTML/CSS
- **Libraries/Frameworks:** ReactJS, FastAPI, Pandas, NumPy, Scikit-Learn, TensorFlow, Matplotlib, LangChain
- **Tools:** Tableau, PowerBI, n8n, GitHub Copilot, PostgreSQL, MongoDB
- **Platforms:** VS Code, Cursor, Antigravity, Jupyter Notebook, Google Colab, RStudio, AWS

Experience

Data Analyst Internship via Impactship Program, HBL Mfb (Onsite)

July 2025-September 2025

- Built real-time transaction monitoring dashboards for DFI Banking Operations, enabling proactive detection of system failures via email alerts and reducing manual monitoring effort.
- 10+ dashboards for transaction flow (Raast + 1link), customer retention, cards monitoring, accounts monitoring (conventional + wallet) and complaints (proactive + reactive).
- Detailed analysis was provided on 10+ granular levels (transaction type, time, atm, app etc.).

Inbound Sales Executive, Massive Dynamics (Onsite)

Feb 2024-July 2024

- Worked as an Inbound Agent on a UK based project where I handled 20+ inbound leads daily, with a 90% lead to sale conversion rate.
- Promoted to Assistant Floor Manager in my last month at the company due to my consistent performance and professional corporate behavior.

Projects

ExVision - Export Intelligence Platform (FYP):

July 2025-July 2026

- Designed an Export Intelligence Platform to predict export demands, optimize prices, analyze competitors, view policies and get AI insights with chatbot. The project covers 100+ product commodities across 10+ countries.
- Data Sources: PBS, WTO, UN Comtrade, IMF, World Bank Pink Sheet, UNCTAD.
- Tech Stack: Python, ReactJS, FastAPI, PostgreSQL, GitHub Copilot, Google Colab, Gemini API.

InsightPilot - AI-Powered Business Report Generator:

Dec 2025

- User uploads CSV file, system generates a full business analysis report using an LLM. The agent performs statistical summarization, detects trends, flags anomalies, generates visual charts and KPIs and writes a structured pdf report.
- Tech Stack: Python, LangChain, Gemini API, FastAPI, ReactJS, Pandas, Plotly.

Statmate – Football player predictor and classifier:

Jan 2025

- Predicting the performance of football players in the upcoming season using 10,000+ records of 5 seasons with 82% accuracy using Scikit-Learn and Pandas while visualizing results using Seaborn and Matplotlib.
- Finding similar players to the entered player by classifying players using KNN based on their stats.

Achievements & Certifications

- ExVision (FYP) ranked 3rd at Career Expo 2026 || Top 5 in GIKI Softcom || Secured 3rd position in Impactship Program at HBL Mfb || Secured 2nd position in 1st & 3rd semester at COMSATS University Islamabad
- AWS AI Practitioner Course via Udacity.
